Executive Summary (i)

We are in a **pivotal moment in the history of TIM**, a moment where critical business and capital allocation decisions are being made.

We have a very high conviction in the strategic role that TIM plays in Italy and in the **value creation opportunity** that can be realised for all shareholders through a correct **engagement of all stakeholders** in a plan that does not exclusively rely on the sale of NetCo to solve the company's problems.

The plan put forth by the Board of Directors not only lacks clarity and financial sustainability, but it also carries substantial risks that could potentially lead the company into a state of financial tension, and there exists a significant possibility of necessitating a capital increase in the event of prolonged delays in finalizing the sale of the network

This situation and the **lack of any meaningful disclosure about contingency plans** can't continue to be ignored.

The market reaction following the disclosure of the plan figures on 7 March 2024, echoing our apprehensions, has only reinforced our conviction that a new direction is imperative for the long term health and prosperity of TIM

It is now the duty of us shareholders to express ourselves and decide on the course our company should take, properly evaluating every option available to ensure sufficient and quick deleveraging.

Over the course of the last few months, **we worked on an effective and executable business plan for the industrial and financial relaunch of TIM that we named TValue.**

TValue offers optionality and offers an alternative path for TIM. TValue addresses any contingent scenario to make sure that the much needed deleveraging of TIM happens as soon as possible

TValue's vision is to transform TIM into TechCo, a high growth Tech & Infra business dedicated to provide leading edge solutions to Business and Public Administration clients leveraging its pervasive network.

Executive Summary (ii)

TValue **refocuses TIM where it has a unique competitive advantage** and can become a European leader.

This transformation will be executed by **immediately divesting from non-core operations** such as TIM Brasil already in 2024 **and businesses lacking competitive advantages** such as TIM Consumer by mid 2025.

The immediate sale of TIM Brasil, already in 2024, will generate the **liquidity cushion** to start serving the existing debt and execute the transformation plan. Already by summer 2024, we will initiate discussions with potential buyers to accelerate the sale of TIM Consumer and positively execute it as quickly as possible and in any case no later than mid 2025.

TechCo will act as a market aggregator, moving to the role of predator rather than the one of potential prey in the value-added telco edge space, AI and related computing revolution, cloud, ICT, cybersecurity and IoT. TechCo will achieve the right scale and become a European leader in this space, also through fostering and leveraging strong and newly designed connections with the key global powerhouses.

Such transformation will not only **create superior value for all shareholders** thanks to its cutting edge added value, higher margins, and higher market multiples, but will also support Italy in meeting its digitalisation targets and boost the entire national economic system.

We firmly believe that decisions that significantly impact the future of our company should be taken in the appropriate venue, adhering to the **highest standards of corporate governance**: the shareholders' meeting. With this in mind, we have announced the candidacy of a slate of highly qualified professionals, led by Mr. Paolucci as Chairman and Mr. Siragusa as CEO, for the upcoming Board of Directors election to ensure a new course of action in TIM for the benefit of all shareholders and employees.

Our team is committed to executing the Tvalue plan, which we believe offers a **sustainable and strategic path forward for TIM**, not just based on the liquidation of the network.

TValue: 5 Key Pillars of the Plan

Assess NetCo Deal

Inclusivity is paramount

- Execution of this deal requires an inclusive approach: doing it against the will of key stakeholders will inevitably lead to its delay and legal battles
- TValue is committed to openly engage with all the major **shareholders** (starting from Vivendi and CDP), **stakeholders** (including the MEF, KKR and OpenFiber) to find the right way to execute the deal and avoid unnecessary delays

Business & financial soundness is essential

- TValue **meticulously analysed** and **planned against any potential scenario** with a **contingency plan for each one** to ensure the much-needed deleverage happens in any case and the company can start thinking about its future without the burden of the past

Reassurance for employees is key

- We will involve **employees** and **trade unions** to assess the implications of the deal and the necessary remedies to avoid any further delays

Competitiveness is crucial

- We will **address any concern raised by Regulators and Other Operators**, ensuring **transparency** and **compliance** with industry standards
